Stage 1: Mini-Project and Friday Presentations

Stage 1 Overview

During Stage 1, every participant will work on a mini-project and present their work on **Friday at 09:00**.

Each group will have **10 minutes to present** their project. This stage will give us an opportunity to assess each participant's progress, understand their approach to solving problems, evaluate their technical skills, and identify the participants who will move forward to the next stage of the hackathon.

Participants should focus on demonstrating their understanding of the problem, their proposed solution, the technologies they have used, and the progress they have made.

Please prepare your presentation carefully and ensure that you can explain your work and demonstrate your project within the allocated time.

Friday Mini-Project Presentation Guidelines

Presentation time: 10 minutes per group
Start time: 09:00

1. Introduction and Team Members - 1 minute

- Introduce yourself and your team members, if working in a group.
- State your project name.
- Briefly explain what your project is about.

2. Problem Statement -1 minute

- What problem are you trying to solve?
- Who experiences this problem?
- Why is it important to solve it?

3. Proposed Solution - 1 minute

- Explain your idea and how it addresses the problem.
- Highlight the main features of your solution.
- Explain what makes your solution useful.

4. Live Demonstration - 3 minutes

- Show your website, application, prototype, or other project deliverable.
- Demonstrate how the solution works.
- Walk us through the main features.
- If your project is not fully functional, demonstrate the progress you have made so far.

5. Technologies and Implementation - 1 minute

- Identify the programming languages, frameworks, tools, or cloud services you used.
- Briefly explain how your solution works behind the scenes.
- Highlight the most challenging part of the implementation.

6. Challenges and Lessons Learned - 1 minute

- Explain the challenges you encountered.
- Describe how you approached solving them.
- Identify what you would improve if you had more time.

7. Conclusion and Questions - 2 minutes

- Summarise the value and potential impact of your solution.
- Explain what you would work on next.
- Be prepared to answer questions from the organisers.

Important Reminders

- Keep your presentation within the allocated 10 minutes.
- Ensure your project is ready to demonstrate before your presentation begins.
- Clearly explain your own contribution and understanding of the project.
- Focus on the problem, your solution, and the progress you have made.
- If some features are incomplete, be honest about what works and explain your next steps.
- Be prepared to answer questions about your technical decisions and implementation.

The objective of Stage 1 is to assess progress, problem-solving ability, technical understanding, creativity, and the potential of each project as we identify participants who will advance to the next stage.

Good luck to everyone. We look forward to seeing your ideas and what you have built!
